ILO7013	Management Information System	20	20	20	80	3	-	-	100

Course Objectives: The Course aims to

1. The course is blend of Management and Technical field.
2. Discuss the roles played by information technology in today's business and define various technology architectures on which information systems are built
3. Define and analyze typical functional information systems and identify how they meet the needs of the firm to deliver efficiency and competitive advantage
4. Identify the basic steps in systems development

Course Outcomes: Learners will be able to

1) Explain how information systems Transform Business
2) Identify the impact information systems have on an organization
3) Describe IT infrastructure and its components and its current trends
4) Understand the principal tools and technologies for accessing information from databases to improve business performance and decision making
5) Identify the types of systems used for enterprise-wide knowledge management and how they provide value for businesses

DETAILED SYLLABUS: total six module for each subject (13 Weeks)

Sr. No.	Module	Detailed Content	Hours	CO Mapping
I	**Information Systems & Strategy**	1.1 Introduction to Information Systems (IS): Computer Based Information Systems, 1.2 Impact of IT on organizations, 1.3 Importance of IS to Society.	04	CO1 CO2

		1.4 Organizational Strategy, 1.5 Competitive Advantages and IS.		
II	**Data Management & Business Intelligence**	2.1 Data and Knowledge Management: Database Approach, Big Data, Data warehouse and Data Marts, 2.2 Knowledge Management 2.3 Business intelligence (BI): Managers and Decision Making, 2.4 BI for Data analysis and Presenting Results	**08**	**CO2 CO4 CO5**
III	**Information Security & Ethics**	3.1 Ethical issues and Privacy: Information Security. 3.2 Threat to IS and Security Controls	**08**	**CO2 CO3**
IV	**Social Computing & E-Business**	4.1 Social Computing (SC): Web 2.0 and 3.0, 4.2 SC in business-shopping, 4.3 Marketing, Operational and Analytic CRM, 4.4 E-business and E-commerce – B2B B2C. 4.5 Mobile commerce.	**08**	**CO1 CO2 CO5**
V	**Networks & Cloud Computing**	5.1 Computer Networks Wired and Wireless technology, 5.2 Pervasive computing, Cloud computing model.	**06**	**CO3**
VI	**Enterprise Systems & SDLC**	6.1 Information System within Organization: Transaction Processing Systems, Functional Area Information System, 6.2 ERP and ERP support of Business Process. 6.3 Acquiring Information Systems and Applications: Various System development life cycle models.	**08**	**CO1 CO2 CO5**
		Total No. of Lectures:	**42**

Assessment:

Internal Assessment (IA) for 20 marks:

- ✓ IA will consist of Two Compulsory Internal Assessment Tests. Approximately 40% to 50% of syllabus content must be covered in First IA Test and remaining 40% to 50% of syllabus content must be covered in Second IA Test.

Question paper format:

- Question Paper will comprise of a total of **six questions each carrying 20 marks Q.1** will be **compulsory** and should **cover maximum contents of the syllabus.**
- From the **remaining five questions, attempt any three. The Remaining five questions** will be **mixed in nature** (part (a) and part (b) of each question must be from different modules. For example, if Q.2 has part (a) from Module 3 then part (b) must be from any other Module randomly selected from all the modules).
- A total of **Four questions** need to be answered.
